ONGOING

Newsletters for supporting organizations

Every month the COABC receives newsletters from organizations with related interests or with whom we are members. So as not to repeat everything written, take a moment to read their newsletters.

- **BC Agriculture Council** COABC is a member under the Community Agriculture seat.

BC CERTIFIED ORGANIC CHECKMARK LOGO

The logo of the BC Certified Organic program is a key tool to identify certified organic products in BC. It is important that the symbol is used correctly; here is a quick reminder, especially for websites and the exclusion zone (white space.) The Program Symbol is enclosed by a black border. The border ensures that the appropriate white space or exclusion zone is provided around the composite mark. The Program Symbol must be enclosed by the border if the Symbol is applied against colored or complex backgrounds. However, if the background is white or off-white, it may be desirable to omit the border while ensuring the appropriate exclusion zone.

COMPLAINTS SUBMISSION FORM

Canada Organic Office complaint submission form can be found at <http://www.certifiedorganic.bc.ca/programs/cor.php>. For complaints against an interprovincial traded product see the COO complaint form at <http://certifiedorganic.bc.ca/programs/cor.php>. Complaints on this form are to be directed to the Canada Organic Office directly OPR.RPB@inspection.gc.ca.

REMINDER – SHIPPING IN AND OUT OF PROVINCE

For certified organic operators who wish to ship outside the province (nationally or internationally) don't forget that you now must be certified under under ISO rather than the provincial BC certified organic program.

OSDP DEADLINE APPROACHING

Intake Deadline: June 24, 2011

Contact: Paddy Doherty, [osdp\(a\)certifiedorganic.bc.ca](mailto:osdp(a)certifiedorganic.bc.ca)

The Organic Sector Development Program Strategic Initiative is a fund for the development of the BC organic sector. This is a funding program with the objective of facilitating the agriculture, agri-food, and agri-based products sector's ability to seize opportunities, to respond to new and emerging issues, and to path-find and pilot solutions to new and ongoing issues in order to help it adapt and remain competitive.

GMO CROP SAFETY ASSESSMENT STUDY

Full study details, <http://www.enveurope.com/content/23/1/10>

Results

Several convergent data appear to indicate liver and kidney problems as end points of GMO diet effects in the above-mentioned experiments. This was confirmed by our meta-analysis of all the *in vivo* studies published, which revealed that the kidneys were particularly affected, concentrating 43.5% of all disrupted parameters in males, whereas the liver was more specifically disrupted in females (30.8% of all disrupted parameters).

Conclusions

The 90-day-long tests are insufficient to evaluate chronic toxicity, and the signs highlighted in the kidneys and livers could be the onset of chronic diseases. However, no minimal length for the tests is yet obligatory for any of the GMOs cultivated on a large scale, and this is socially unacceptable in terms of consumer health protection. We are suggesting

that the studies should be improved and prolonged, as well as being made compulsory, and that the sexual hormones should be assessed too, and moreover, reproductive and multigenerational studies ought to be conducted too.

BC Ag CLIMATE ACTION INITIATIVE
